

1.What problem does Salesforce solve?

answer:Salesforce helps companies keep customer data in one place.
It makes work easy and saves time

2. What is CRM?

CRM means Customer Relationship Management.

It is used to store customer details and manage customer relationships.

3. What is an Object in Salesforce? Give one example.

An Object is a place to store data in Salesforce.

Example: Student Object

It stores student name, roll number, and marks.

4. Difference between Salesforce Admin and Developer

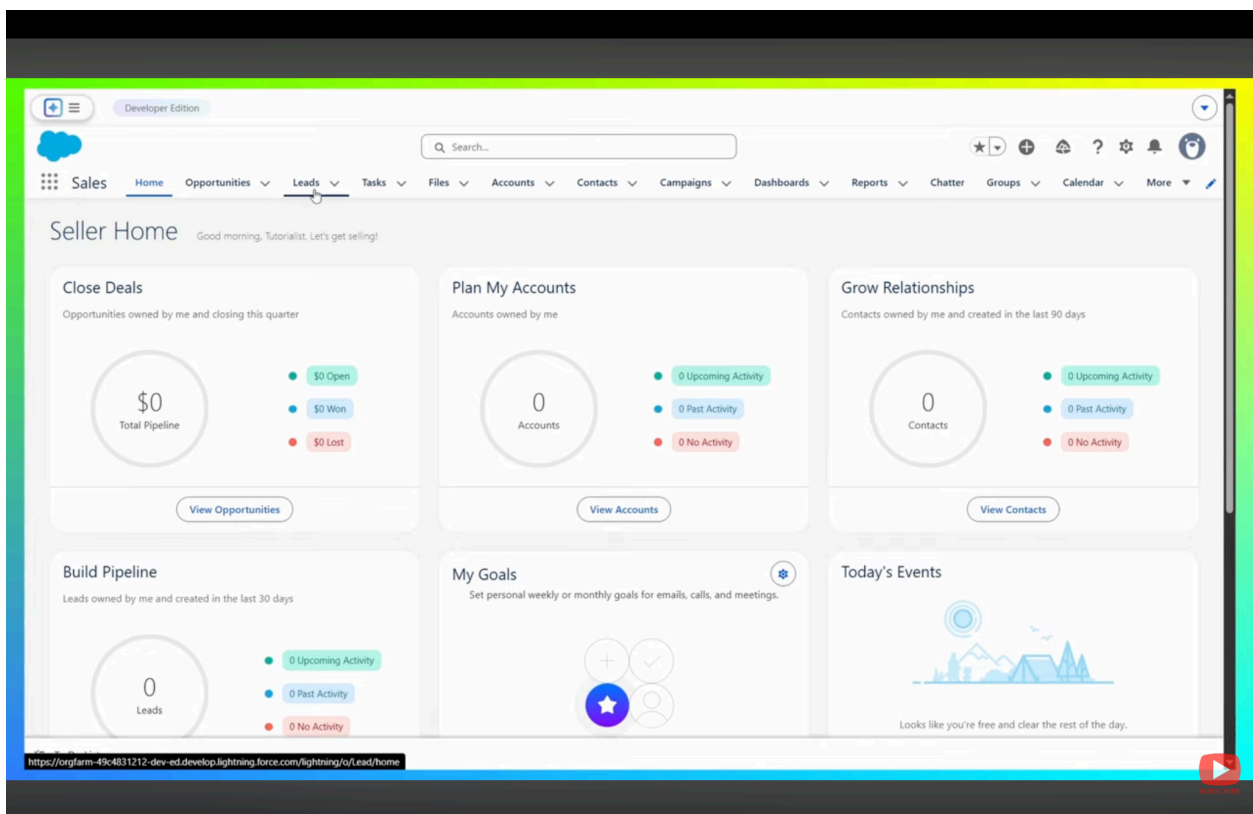

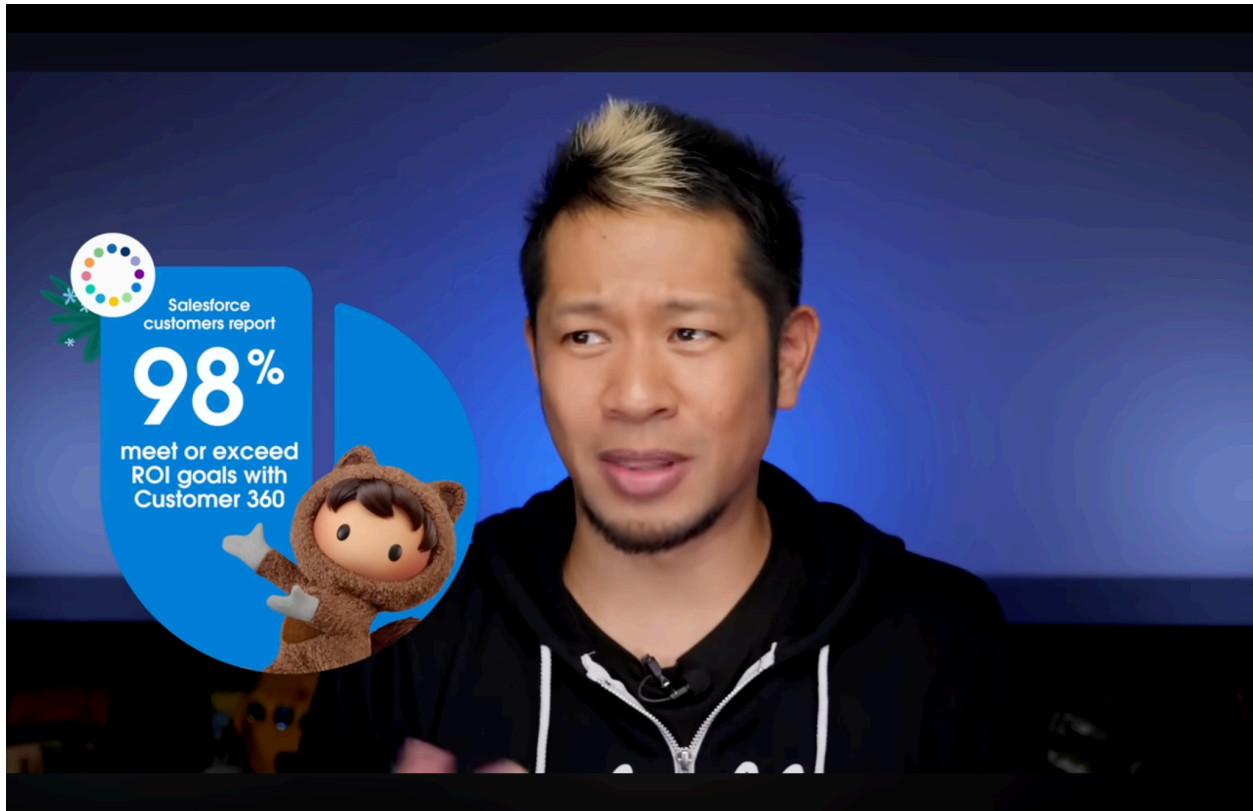

Admin: Manages Salesforce settings

Developer: Writes code and builds apps

5. One real-world application built using Salesforce

Student Management System

It is used to store student details, marks, and attendance.

Salesforce CRM interface showing a Lead record for Drew Brockbank. The interface includes a sidebar with navigation options (Home, Contacts, Accounts, Sales, Service, Marketing, Commerce, Generative Canvas, Your Account) and a top navigation bar with tabs (Sales, Leads, Contacts, Accounts, Opportunities, Products, Price Books, Calendar, Analytics). The main content area displays the Lead record details, including Name, Company, Title, Website, Description, Lead Status, Lead Owner, and Segment. A sidebar on the right shows activity history and filters. A video player is visible in the bottom right corner.
