

What is CI/CD?

- **CI:** Continuous Integration.
- **CD:** Continuous Delivery.
- **Automation:** It tests code automatically.
- **Speed:** It ships updates quickly.

Why Deployment Workflow Matters

- **Safety:** It stops messy mistakes.
- **Efficiency:** It saves developer time.
- **Consistency:** It keeps apps stable.

Problems Without Version Control

- **Overwriting:** Teammates delete each other's work.
- **Loss:** Old code gets lost forever.
- **Confusion:** Nobody knows who changed what.

GitHub + DX + DevOps Explanation

- **GitHub:** Stores the official code files.
- **Salesforce DX:** Provides the building tools.
- **DevOps:** Connects them into one system.

Enterprise Deployment Risks

- **Breakage:** Breaking live company software.
- **Data Loss:** Accidentally deleting customer data.
- **Downtime:** Facing expensive system outages.

Reflection

- **Fewer Errors:** Automation stops human mistakes.
- **Protection:** Good processes protect the business.
- **Growth:** Teams build better features faster.
